Introduction

Prestashop Social login module allows your customers to register and login to your Prestashop store by using their social accounts from 14 social networks such as Facebook, Google Plus, Twitter, Foursquare, Live, Wordpress etc. This social login Prestashop module not only enhances your user's experience but also increases sales and conversions.

Why use this Prestashop social media login plugin?

- Prestashop facebook login addon reduces login/registration time of the customer.
- Prestashop twitter login addon offers 14 social login/registration option.
- Prestashop google+ login addon offers user-friendly interface.
- Prestashop social login addon enhances user experience.
- Prestashop social media login addon is fully customizable.

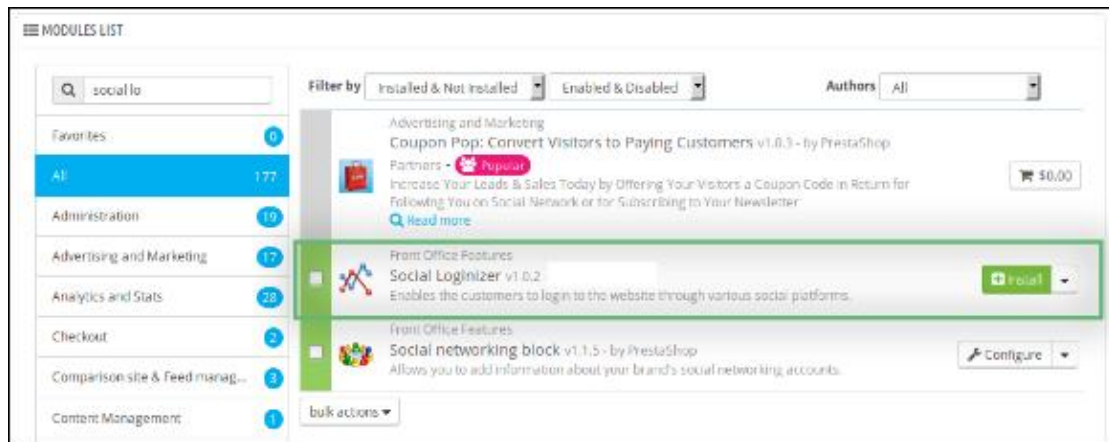

Installation steps of Prestashop Social Media Login Plugin:

- Folder structure of the Prestashop Social Login plugin folder.

- Copy the whole folder named as social loginizer into your modules folder of the root directory of your PrestaShop store through FTP.
- You can also upload zip folder of the module by clicking on Add New Module button, which should appear just in the top right corner of module listing page.

- After that, you will be able to find the Prestashop social login plugin ready to be installed in the Modules in your PrestaShop store as shown below.

- Click on the Install link to install this Prestashop social media login addon.

Admin Module of Social login Prestashop module

Here, the store owner can change the various settings of this Prestashop twitter login module according to the requirements, which will be reflected at the front end as well as in the admin panel of the Prestashop facebook login plugin.

After installing social login Prestashop module into the store, this Prestashop plugin will provide following tabs in the interface:

- General Settings
- Facebook Settings
- Google Plus Settings
- Live Settings
- Linkedin Settings
- Twitter Settings
- Yahoo Settings
- Amazon Settings
- Paypal Settings
- Foursquare Settings
- Github Settings
- Disqus Settings
- Vkontakte Settings
- Wordpress Settings
- Dropbox Settings

- FAQs
- Suggestions
- Other Plugins

Each tab is explained below.

General setting of Prestashop social login plugin:

On clicking on configure link on module listing page (configure link will automatically appear once you install the plugin), the system will open general settings tab of the Prestashop google+ login plugin by default as shown in the screen shot below:

Not able to configure any option? Get prompt help from us. [Contact us](#) [Save](#) [Cancel](#)

General Settings

Enable/Disable: ☒ ON ☐ OFF

Show Popup: ☒ ON ☐ OFF

Button Arrangements: Drag and drop these buttons to change sort order.

Show on SuperCheckout: ☒ Do not show
Note: Social Login options (both Google and Facebook) from SuperCheckout configuration must be disabled for this functionality to work.
☐ Small Buttons
☐ Large Buttons

Custom CSS:

```
a.hover-link.form-style { display: none; }
```

Page	Status	Position	Button Size
Home Page	Enable	Header	Small
Category Page	Enable	Header	Small
Product Page	Enable	Header	Small
Login Page	Enable	Right Column	Large
Five Steps Checkout Page	Enable	Header	Small

Initially, fields in the above form will be already filled with their default values.

- **Enable/Disable:** Initially, this field of the Prestashop social login plugin will be OFF. Admin can enable/disable Prestashop social media login module by turning ON/OFF this setting.
- **Show Popup:** After enabling this field of Prestashop social media login plugin, it will show the login popup when the customer will click on any of the social login options.
- **Button Arrangement:** Here, in this field of social login Prestashop module, the admin can change the sequence of the buttons as they appear at the front-end just by dragging and dropping the icon.

- **Show on SuperCheckout:** This field of Prestashop google+ login plugin module allows the admin to show this Prestashop social media login plugin on the SuperCheckout page. The admin can also select the button sizes either small or large. If he doesn't want to show this social login option, then he can disable this by selecting "Do Not Show" option.
- **Custom CSS & JS:** Prestashop social media login plugin allows the admin to change the look and feel of the social login Prestashop plugin as per his choices.
- The admin can also manage the status, position and button size of the Prestashop social login plugin. Such as, at which page he wants to show the extension (Home Page/Category Page/Product Page/Login Page etc.), what would be the position of this Prestashop extension (Header/Footer/Left Column/Right Column) and what would be the size (Small/Large).

Statistics of Prestashop social login module

This field of Prestashop twitter login module allows the store owner to view the report of Login and Registered users in graphical and tabular both format. (Whether it is the social login or login with email id and password)

Frequently Asked Questions

1. I have setup the social API according to the manual but it is still not working. What should I do?

In such case it is recommended to review the settings and data provided by you in the developer account of the respective social platform and if you can not figure out the issue, kindly contact us with admin and FTP login details.

2. Can you implement any other website login feature into this module for additional cost?

Yes, we can implement it for you. You can contact us for any kind of customization in this module.

3. I have enabled buttons for left column on login page, but left column is not coming with these buttons.

Kindly ensure that left column is enabled in your theme for Login page. To check go to, Preferences->Themes->Advance Setting->Enable left column from there for login page.

4. I need to change background of footer buttons block.

In custom CSS field, use below code:

```
.sl_footer{ background-color:green !important; }
```

This tab of social login Prestashop module contains several questions (with answers to them) that are asked by our customers. We recommend you to go through the questions before raising any ticket for this Prestashop facebook login plugin.

Want us to include some feature in next version of this module?

[Share your idea](#)

*** If you like our module, do not forget to give us 5 STAR rating on the above link. This will definitely boost our morale.

Features that we have added till yet based upon our customers suggestions.

1. Compatibility for store with multiple languages - *by Aharon Titus*
2. Option to show popup when customer click on social login button - *by Merwyn*

Thanks to all, as you helped us improve this module by sharing your Ideas and pointing out bugs.

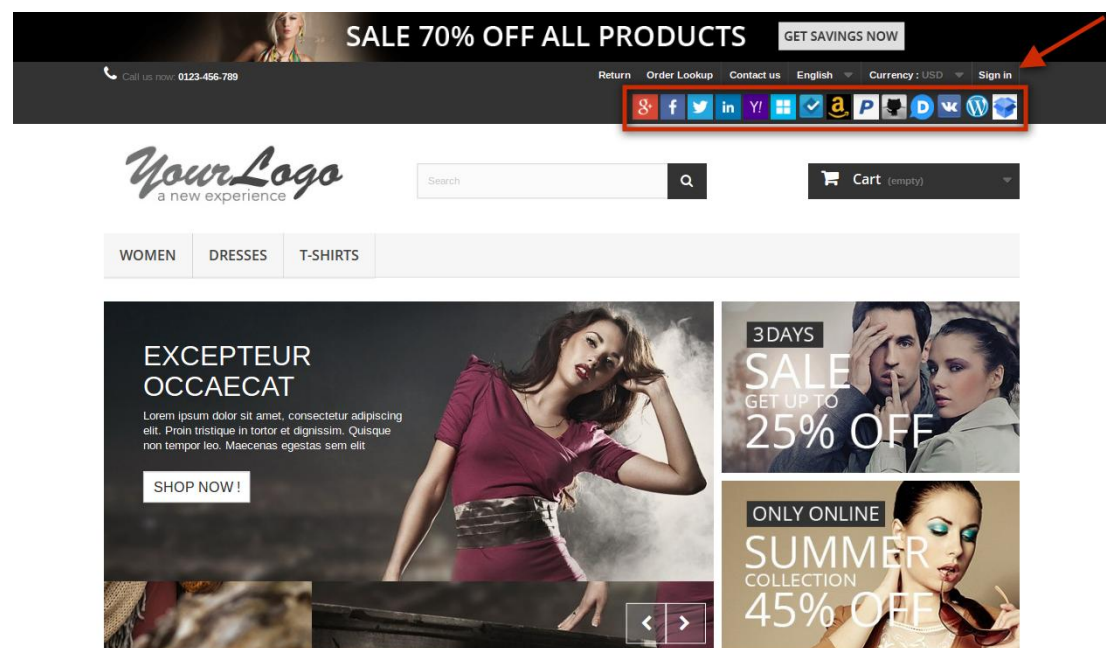

Regards,
Knowband Team

In case you want to give any suggestions for some new features to be included in the new version of this Prestashop Google+ login plugin than you can use this tab.

Other Plugins:

This tab redirects to our developer page having the list of other plugins developed by us. If you like this Prestashop social media login plugin then you can try our other Prestashop plugins as well.

Front End Prestashop social login module:

On the front end of this Prestashop social login plugin, customers can see the social login buttons near 'Sign in' option as we have set the small button in the header of the website. Below is the screen shot of the same:

Short Code Functionality

In case you want to display social login buttons somewhere else where module has no access. So, there is short code functionality providing you a way to display social login buttons anywhere throughout your site. To do this, you just have to put a line of code in your respective tpl file accordingly. The line of code is given below:

Code for display small icon:

```
hook h='customLoginizerShortCodeHook' size='small'
```

Code for display large icon:

```
hook h='customLoginizerShortCodeHook' size='large'
```

Recommendations:-

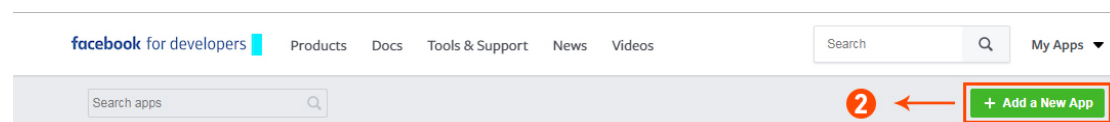

Refresh home page of your store every time you enable/disable social media login Prestashop plugin. If Prestashop social login plugin is not working after installation then please check permissions on modules folder. The folder should be writable. Please make the folder permission to 755.

How to get Facebook App details?

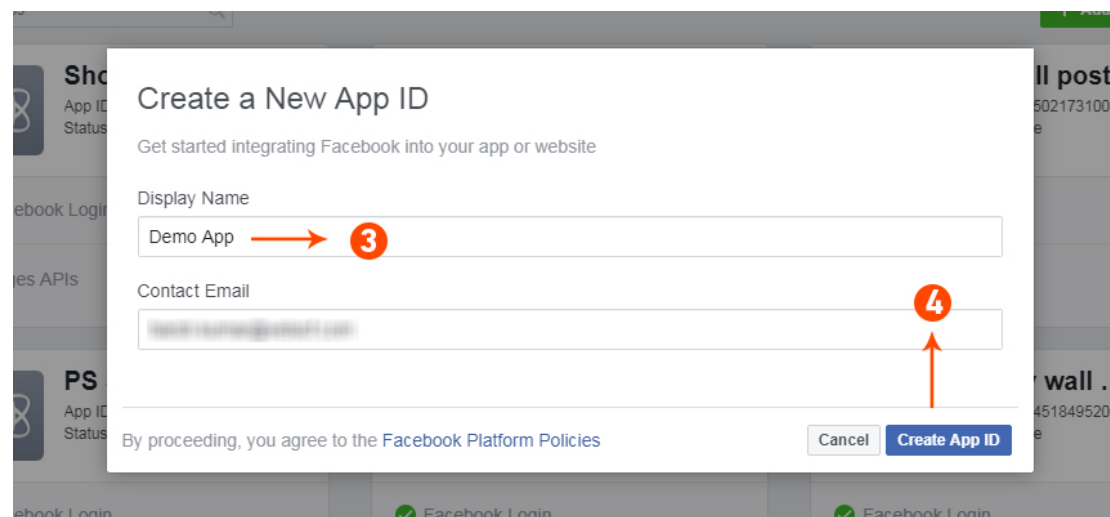

Facebook App can be created by following below mentioned steps:-

Step 1: Go to given URL: <https://developers.facebook.com/apps/>

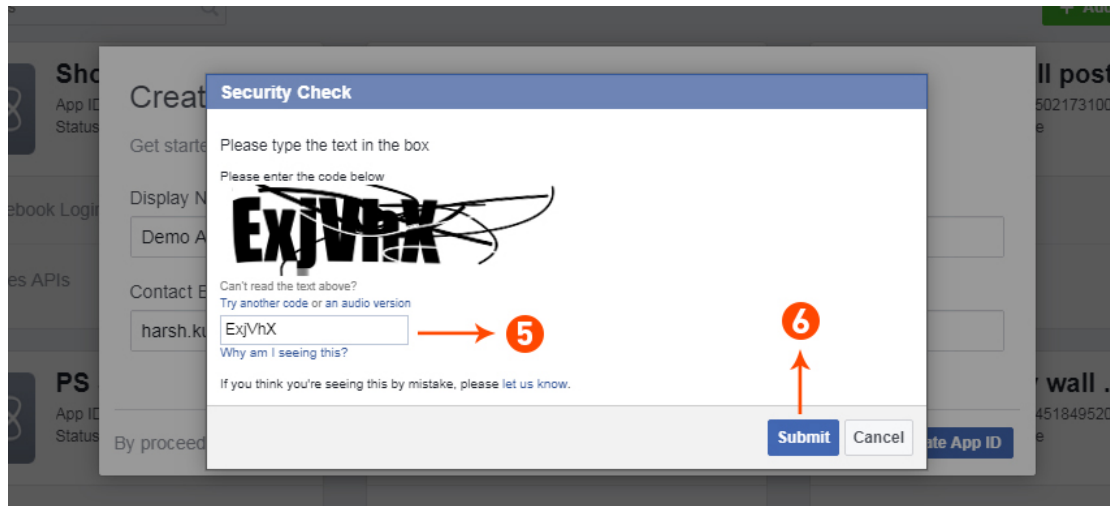

Step 2: Click on the “Add a New App” button.

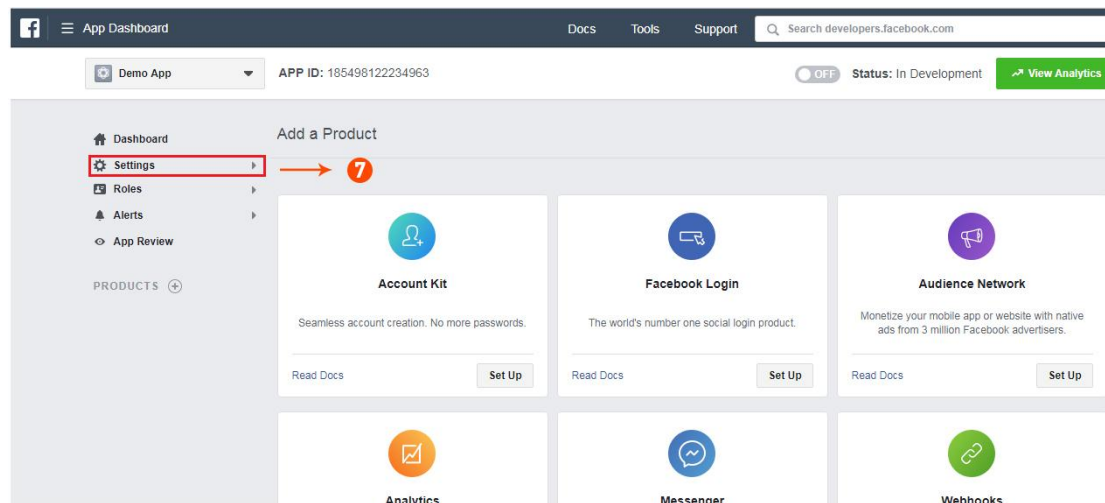

Step 3&4: Enter your App name and email id, then click on “Create App ID” button.

Step 5&6: After clicking on Create App ID you will have to go through a security check as shown:

Step 7: Click on “Setting” tab.

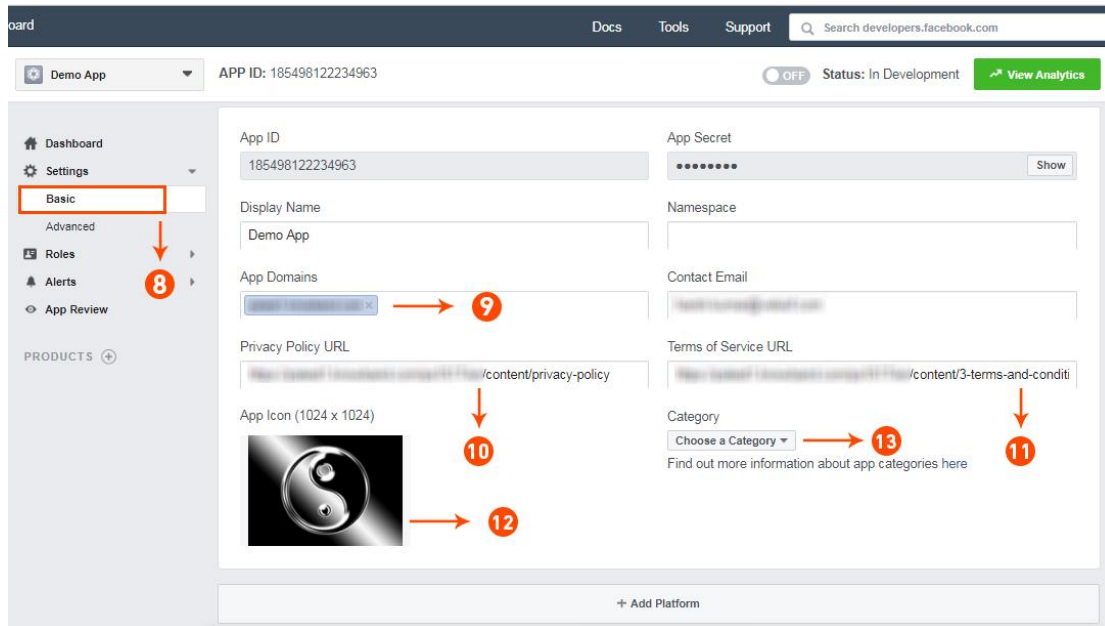

Step 8-13: Two option will be available in the dropdown, Basic and Advanced, click on "Basic". And then enter your “App Domain”, “Contact Email”, “Privacy URL”, “Terms and Conditions URL”, “Add Logo”, “Select Category” and click on “Save Changes” button.

App Domains:

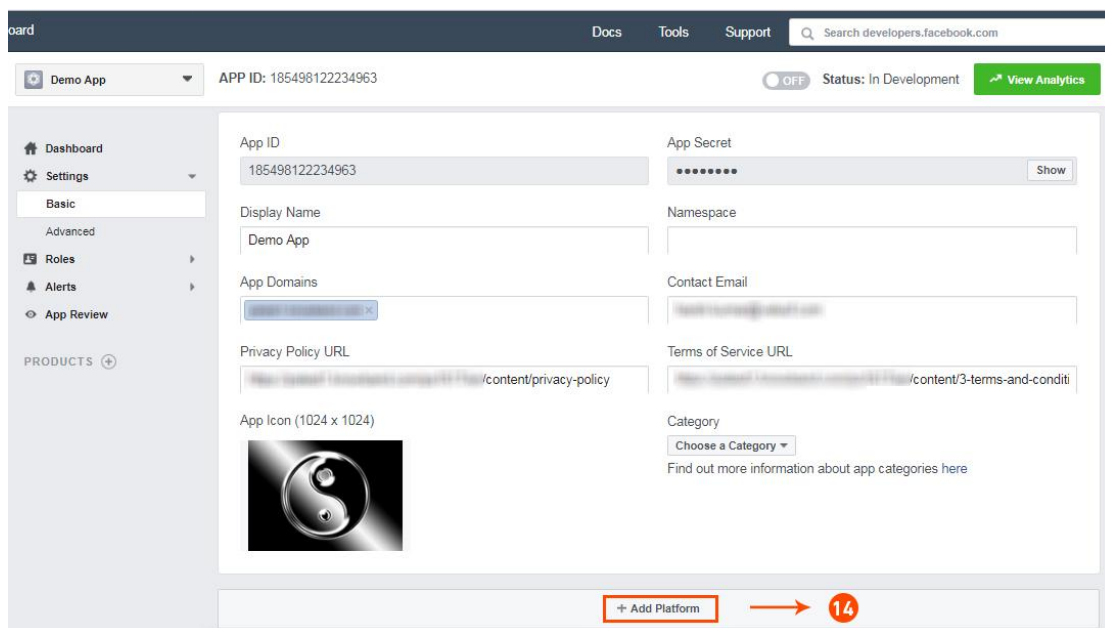

yourdomain.com is **correct**

yourdomain.com/store is **incorrect**

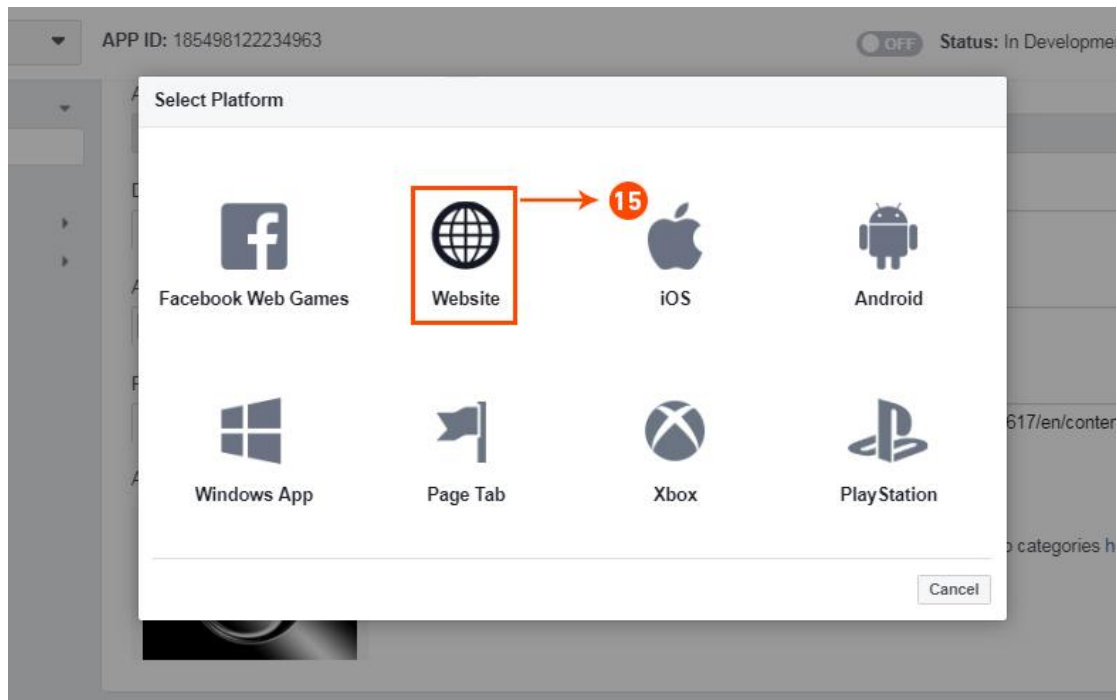

www.domain.com is **incorrect**

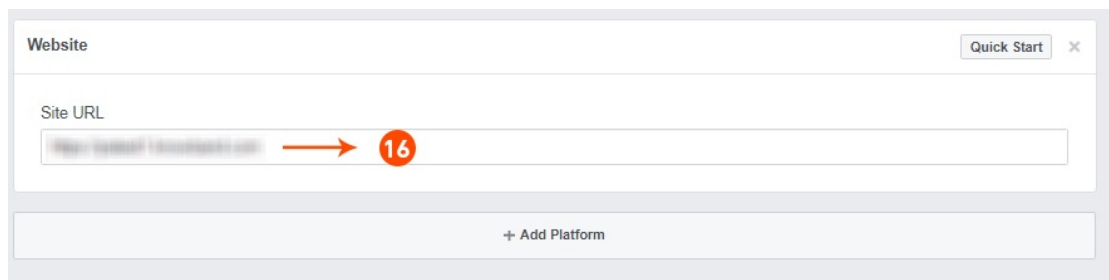

Step 14: Now click on "+Add Platform".

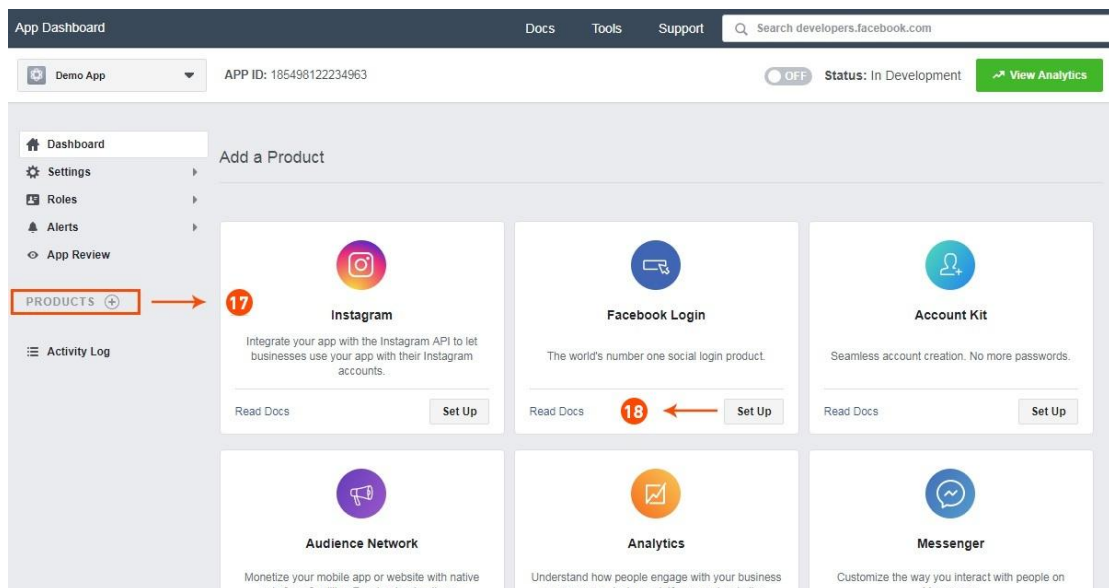

Step 15: And select Website as Platform

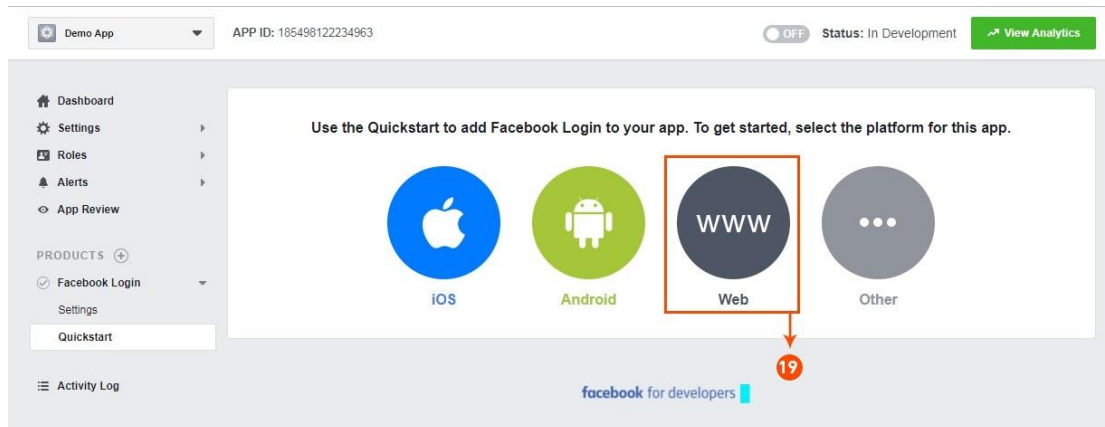

Step 16: Now Enter your site URL.

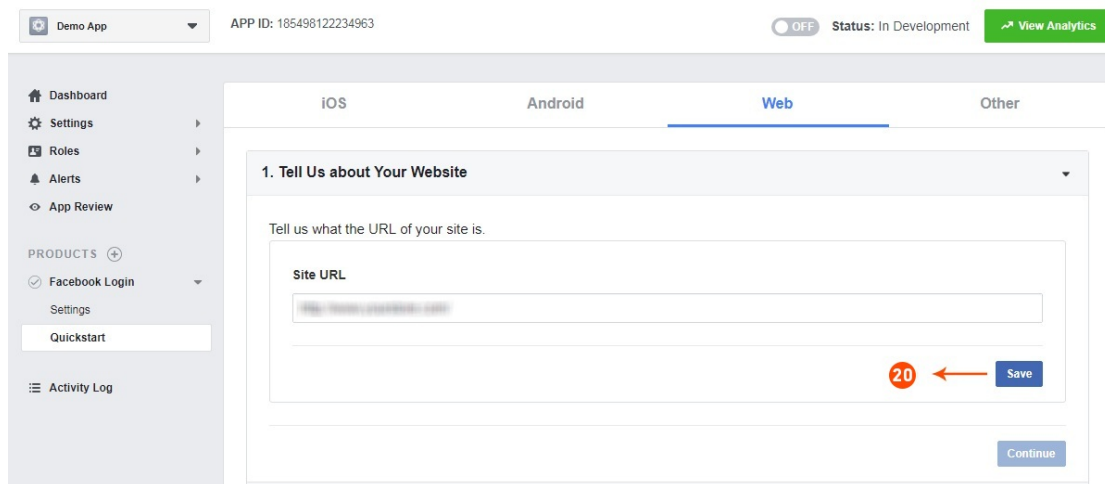

Step 17&18: Click on "Products+" and select Facebook login.

Step 19: Select web as the platform for the app.

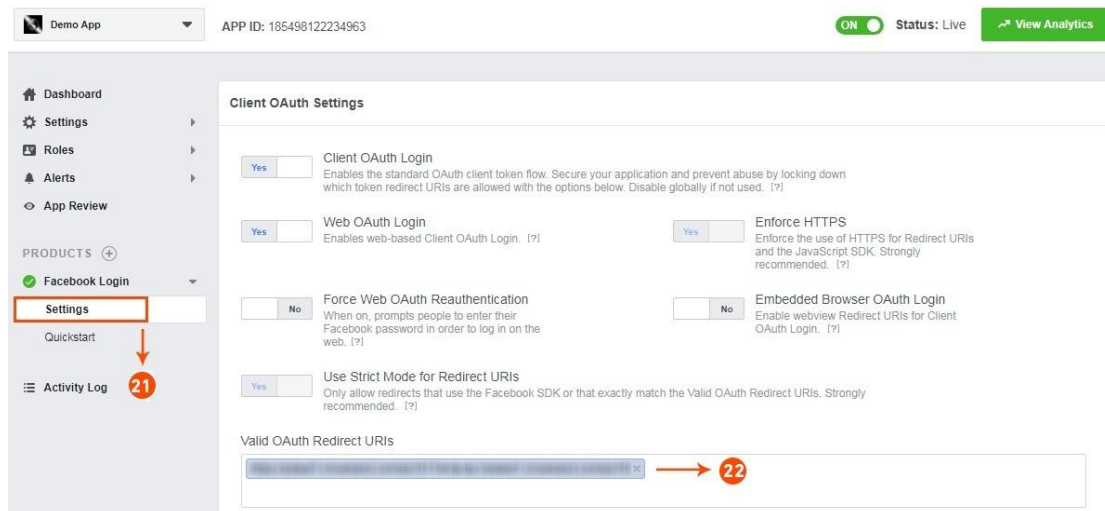

Step 20: Now click on save.

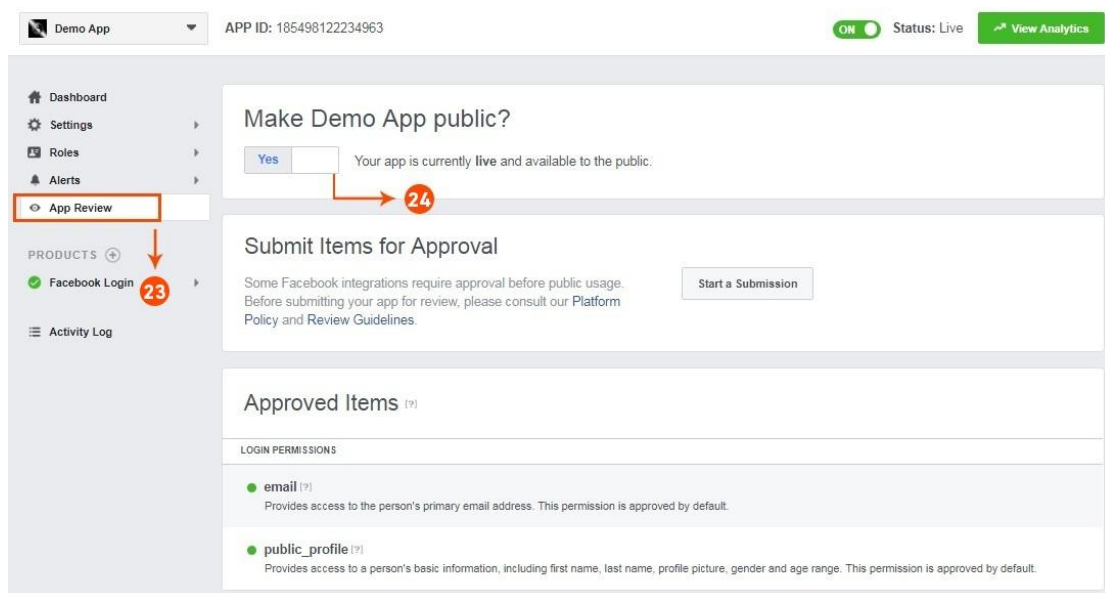

Step 21&22: Click on Settings and add a Valid OAuth Redirect URIs.

Valid OAuth Redirect URIs:

<http://www.yourstore.com/module/socialloginizer/facebook>

Step 23&24: Click on "App review". And mark "Make 'your app name' Public" to Yes.

Final Step: Copy the App ID and App Secret and paste it into the fields provided in the module.

The screenshot shows the configuration page for a 'Demo App'. At the top, there's a header with 'Demo App' (dropdown), 'APP ID: 185498122234963', a status indicator 'ON' (green circle), 'Status: Live', and a 'View Analytics' button. On the left is a sidebar menu with options: Dashboard, Settings (selected), Basic (selected), Advanced, Roles, Alerts, App Review, PRODUCTS (+), Facebook Login, and Activity Log. The main content area contains several input fields: 'App ID' (with a 'COPY' button), 'App Secret' (with a 'COPY' and 'Reset' button), 'Display Name' (set to 'Test App'), 'Namespace' (empty), 'App Domains' (with a dropdown), 'Contact Email' (with a dropdown), 'Privacy Policy URL' (with a dropdown), and 'Terms of Service URL' (with a dropdown).

How to get Google App details?

- Go to Google Developers Console (<https://console.developers.google.com/project>) or click on link given top right of the respective tab in module configuration page.
- Now click on Create Project on the left of the page.
- Enter a name for your project and proceed to the next step.
- Now click on APIs and auth-> Credentials from the left menu as shown below.

The screenshot shows the 'API Project' page in the Google Developers Console. The left sidebar has a menu with 'API Project' (selected), Overview, APIs & auth (expanded), Permissions, Settings, Support, Compute Engine, and Cloud Storage. Under 'APIs & auth', the sub-menu includes APIs, Credentials (selected), Consent screen, and Push. The main content area is titled 'OAuth' and contains the text: 'OAuth 2.0 allows users to share specific data with you (for example, contact lists) while keeping their usernames, passwords, and other information private.' Below this text is a 'Learn more' link and a red button labeled 'CREATE NEW CLIENT ID'.

- Click Create New Client ID button from the right panel of the screen.
- You may have to fill the form for Consent Screen before proceeding. To do so, that you have to click on Consent Screen in the left menu as shown in the image above.
- Fill the pop-up form with below details:

Application Type: Web Application.

Authorized JavaScript Origins: Your store domain name
(<http://www.yourstore.com>).

Authorized redirect URI or URI of Loginizer redirect page:

In case you are using SEO Friendly URL for your store then use this -

<http://www.yourstore.com/module/socialloginizer/google>

Otherwise use this -

<http://www.yourstore.com/index.php?fc=module&module=socialloginizer&controller=google>

Create Client ID

APPLICATION TYPE

☒ **Web application**
Accessed by web browsers over a network.

☐ **Service account**
Calls Google APIs on behalf of your application instead of an end-user. [Learn more](#)

☐ **Installed application**
Runs on a desktop computer or handheld device (like Android or iPhone).

AUTHORIZED JAVASCRIPT ORIGINS
Cannot contain a wildcard (http://*.example.com) or a path (http://example.com/subdir).

https://www.example.com

AUTHORIZED REDIRECT URI
Needs to have a protocol, no URL fragment, and no relative paths

https://www.example.com/oauth2callback

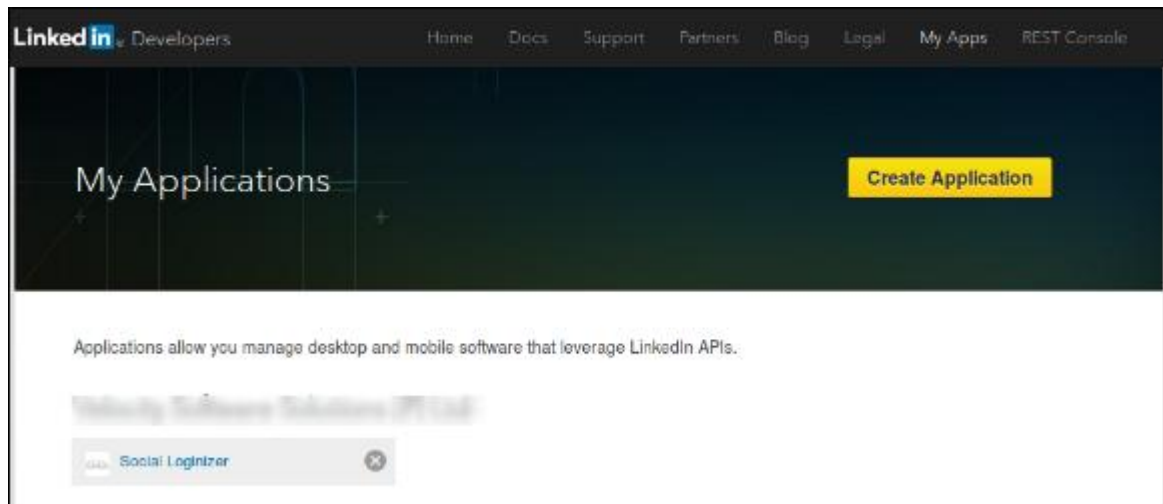

Create Client ID

Cancel

- Now click Create Client ID button to get your Client ID and Client Secret Key.
- Now you can use the client secret and client ID to let your customers login to your store using their Google account.

How to get LinkedIn App details?

- Go to LinkedIn Developers (<https://www.linkedin.com/secure/developer>) or click on link given top right of respective tab in module configuration page.

- Click on Create Application button.
- Fill the form to register a new application. Website URL must be your Store URL like <http://www.yourstore.com>.
- After filling the form click on Submit to submit the form and keep your API Key and Secret Key safe.

App Settings
Localization

To protect your app's security, [Windows Push Notification Services \(WNS\)](#) and services using [Microsoft account](#) use client secrets to authenticate the communications from your server.

Client ID:
00000000-2F1

Client secret (v1):
kdsS2HIDD- sXRU5gYXIF8-IG

If your client secret has been compromised or your organization requires that you periodically change client secrets, create a new client secret here. After you create a new client secret, both the old and the new client secrets will be accepted until you activate the new secret.

[Create a new client secret](#)

Note: Please wait 24 hours before you activate your new client secret, because the old client secret won't work after you activate the new one.

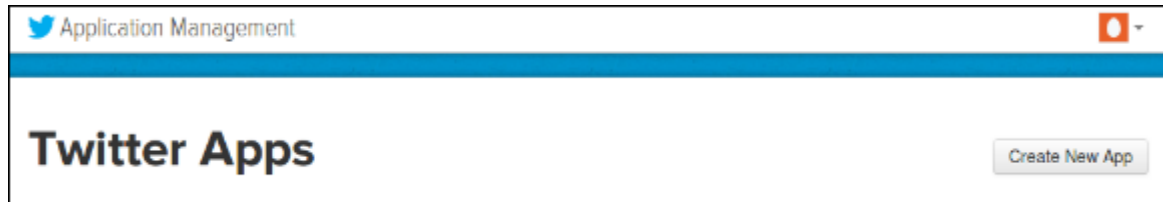

This is a unique identifier for your application.

For security purposes, don't share your client secret with anyone.

- Now you can use the details of the application to let your customers login to your store using their Live or Microsoft Account.

How to get Twitter App details?

- Go to Twitter App Management (<https://dev.twitter.com/apps>) or click on link given top right of respective tab in module configuration page.

- Click Create New App button.
- Enter Application Details as follows:

Application Name : Name of your Application.

Description : 10 to 200 characters description of your application.

Website : Your store URL.

- **Callback URL : Loginizer redirect page URL of your store.**

In case you are using SEO Friendly URL for your store then use this for redirect URL -

<http://www.yourstore.com/module/socialloginizer/twitter>

Otherwise use this -

<http://www.yourstore.com/index.php?fc=module&module=socialloginizer&controller=twitter>

- Now, Click Yes, I agree and then click Create your Twitter application.
- Now, select the Keys and Access Tokens from the menu below your Application Name and copy your API Key and API Secret.

Social Loginizer App

Test OAuth

[Details](#)
